

TM252

Web Technologies

EMA Q & A

Andrew Johnson, Joey Lam & Richard Mobbs

This tutorial will be
recorded

Tutorial Overview

Have you read the EMA Errata

- Important facts
- Mark distribution
- Part 1 – Project Plan & Risk Assessment
- Part 2a – Wireframes
- Part 2b – Design explanation
- Part 2c – Acceptance Tests
- Part 2d – Report structure – writing
- Report structure – citations & references
- Word counts
- Part 3a – Form implementation
- Part 3b – Use of version control
- Part 4 – Discussion
- Part 5 – Reflection
- What to submit
- Checklist

Have you read: EMA Errata

News Item 4th August

...

You should include all files required for your Part 3 solution in addition to 'form.html' and 'custom.css', in the folder structure that they are required for 'form.html' to be viewed in a web browser. Unzipping the EMA submission then opening 'form.html' from the unzipped folder should allow a marker to view your solution.

The simplest way to incorporate Bootstrap into your Part 3 solution is to start with the TMA01 Resource Pack, placing 'form.html' in the 'pages' folder and 'custom.css' in the 'css' folder and removing any files that are not required. Bear in mind that Part 3 requires the use of version control software as you develop your solution.

Important date

- EMA **Tuesday** 16 September (**not** a Thursday!)
- As with all EMAs...
 - Last submission is marked
 - Cutoff is midday
 - Then 12-hour grace period to allow for IT issues
 - Then 24-hour grace period with 10-mark penalty
 - NO extensions are possible!
- Last day to defer is **Monday** 15 September

TM252 Assignments

| Assessment | Submission week | Weighting |
|------------|-----------------|------------|
| TMA 01 | 9 | 20% |
| TMA 02 | 18 | 20% |
| TMA 03 | 26 | 20% |
| EMA | 32 | 40% |

To pass TM252

- You must achieve an overall score of **at least 40**,
- **and** a score of **at least 30** on your EMA.

Resources

- Balsamiq template
- TMA01 Resource pack
- Chrome Browser + WAVE (or equivalent)

Your solution document

- ▶ Your written answers to EMA questions must be provided in **a single** 'solution document', being a Microsoft Word document (.docx or .doc format) which must be named 'oucu_ema' where 'oucu' is your own Open University computer username (OUCU).
- ▶ Other formats, including PDF files, **are not permitted** and will not normally be marked, nor will you be given the opportunity to resubmit in a permitted format.

Note: Name the file:
"oucu_ema.docx"

How to present your answers

- **Structured:** Ensure that your answer is coherent and written in a logical order. Use headings and subheadings to make clear what you are covering in each section.
- **Relevant:** You should ensure that your answers provide only the relevant information that each task asks for and nothing more.
- **Knowledgeable:** Your answer should demonstrate an understanding of the subject matching the level of your studies so far.

How to present your answers

- **Evidenced:** You must demonstrate knowledge of the topic by including supporting, referenced evidence from module materials, external resources etc.\
- **Formal in tone and style:** Wherever possible, you should use appropriate language to ensure that your answer is clear, concise and reasonably balanced when there are multiple opinions or lines of evidence. You should only take an opinionated point of view when the question specifically asks you to do so.

How to present your answers

- **Spelling and grammar:** Marks are available for well-formatted, correctly spelled and grammatically sound answers.

Carefully read your solution document before submitting your assignment and make amendments where necessary

EMA mark breakdown

| Part | Title | Marks |
|------|--|-----------|
| 1 | Planning (work schedule + risk assessment) | 5 |
| 2 | Design report | 45 |
| | - 2(a) Site map and wireframes | 20 |
| | - 2(b) Design explanation | 10 |
| | - 2(c) Acceptance tests | 10 |
| | - 2(d) Report structure and quality | 5 |
| 3 | Implementation | 25 |
| | - 3(a) Form implementation | 20 |
| | - 3(b) Version control | 5 |
| 4 | Discussion | 20 |
| | - 4(a) Front-end frameworks advice | 10 |
| | - 4(b) Sustainability advice | 10 |
| 5 | Reflection | 5 |

EMA Part 01 Project Plan & Risk Assessment

Keep it simple

- Table
- Bulleted List

Identify all your tasks

- Report writing (2b, 2c, 3b, 4a, 4b & 5)
- Installing any software (git?) and using it (3b)
- Wireframes (2a)
- Web form (3a)
- ...

Note: No word limit

EMA Part 01 Project Plan

| Task | Estimated Duration | Start date | Finish date | Notes |
|--|--|------------|-------------|---|
| Reread the application scenario | 10 minutes | 11/08/2025 | 11/08/2025 | |
| Identify the applications requirements and split them into relevant pages | 20 minutes | 11/08/2025 | 11/08/2025 | |
| Design a master page template that details the elements that will be shared across all pages | 1 hour | 11/08/2025 | 11/08/2025 | Use Balsamiq for this task |
| Design individual pages based on the master template | 3 hours (depends on the number of pages) | 11/08/2025 | 12/08/2025 | Refer to notes taken in the second task about the sites pages |
| Write the design explanation | 3 hour | 13/08/2025 | 14/08/2025 | |

EMA Part 01 Risk Assessment

IMPORTANT: 4-6 risks

- Technological failure
- Work
- Family
- Other OU Module conflicts
- Health
- YOU! – misunderstanding the requirement (work and time) Skills shortage etc.

EMA Part 2a Wireframes

How many? Read the EMA carefully Admin View of:

- to create and update the module catalogue
- learning events
- news items – for part 3a
- announcements
- manage student membership
- module registration.

Note: Name the file:
“oucu_q2.bmpr”

EMA Part 2b Design Explanation

- your grouping of functional requirements into pages and actions
- your choice of navigation mechanisms
- how your design will respond when used on a mobile device
- any alternative designs you considered and why you rejected them.

Note: Word limit is 500 words

EMA Part 2c Acceptance Tests

Why we use acceptance tests

- Business Requirements Validation
- Data Integrity and Validation
- User Interface and Usability
- Error Handling and Recovery
- Compliance and Standards

EMA Part 2c Acceptance Tests

- two tests of the requirement to edit an existing learning event
- two tests of the requirement to add a news item.

Task

Setup

Action

Consequence

Note: No word limit

EMA Report structure

- A meaningful title
- A short introduction.
- Main body
- A short conclusion.
- A reference list

EMA Report structure

- A meaningful title for your report (i.e. something that acknowledges the content of the report rather than simply 'EMA Report').
- A main body, clearly divided into sections with appropriate subheadings, each of which should reflect the content.
- A short conclusion.

EMA Report

Report writing is an iterative process

The **P**rocess **W**riting **R**outine

Academic writing should be...

formal

- × a lot of the results I got look kinda dodgy
- ✓ many results are unreliable

precise

- ▶ avoid phrases that require interpretation by the reader
- × everyone has been interested in this stuff for ages
- ✓ researchers have been interested in *** for over 10 years

fact based

- × they reckon the exam was the hardest ever
- ✓ a record 83% of pupils failed to pass the exam

unbiased

- × this is a rubbish idea
- ✓ there are considerable issues with *** such as...

Academic writing should not be...

- › personal

- × In my opinion...
- × I think...
- × I like...

- › but these are OK

- › (though check with your tutor to see whether they agree!)

- ✓ I conducted interviews with...
- ✓ I argue that...
- ✓ I hope to achieve...

Use the first person for reflection.

- › emotive

- × it was absolutely horrific that so many died and were injured and makes this awful tragedy one of the worst catastrophes ever
- ✓ The injury and mortality rates of this incident were among the highest in recent history

- › casual

- › LOL
- › cu l8r
- › can't, won't, you're

EMA Report

Reference lists

- A reference list formatted in the **Cite Them Right Harvard style**.
- All references should be cited in your report using in-text citations.

EMA Report

References

- A report of this size will need several references including those to leading authorities on usability and accessibility.
- References **MUST** be formatted in the Harvard Cite Them Right style.
- A reference is cited within your text
- A reference list must be presented in alphabetical order.

EMA Report

Reference example

A reference is anchored within your text by a citation.
This is of the form:

(name, year)

where name could be an organisation or the family name of an author. For example,

(Nielsen, 1994)

(Note the brackets are needed.)

EMA Report

Reference example

A reference is formatted in the Cite Them Right Harvard style. Since this is a Web site, our format style is:

name, initial(s) (year) *title* Available at: URL (Accessed: date)

For example,

Nielsen, J. (1994) *10 Usability Heuristics for User Interface Design* Available at: <https://www.nngroup.com/articles/ten-usability-heuristics/> (Accessed: 24 August 2025)

(Note the brackets are needed around accessed date but no where else)

How to present your answers

Word Counts

What to include in the word count:

- your answers and other required text (e.g. introduction and conclusion)
- section headings
- content of tables figure and table captions
- in-text citations (e.g. author name and date of publication)
- quotes

How to present your answers

Word Counts

What **not** to include in the word count:

- reference list

How to present your answers

Word Counts

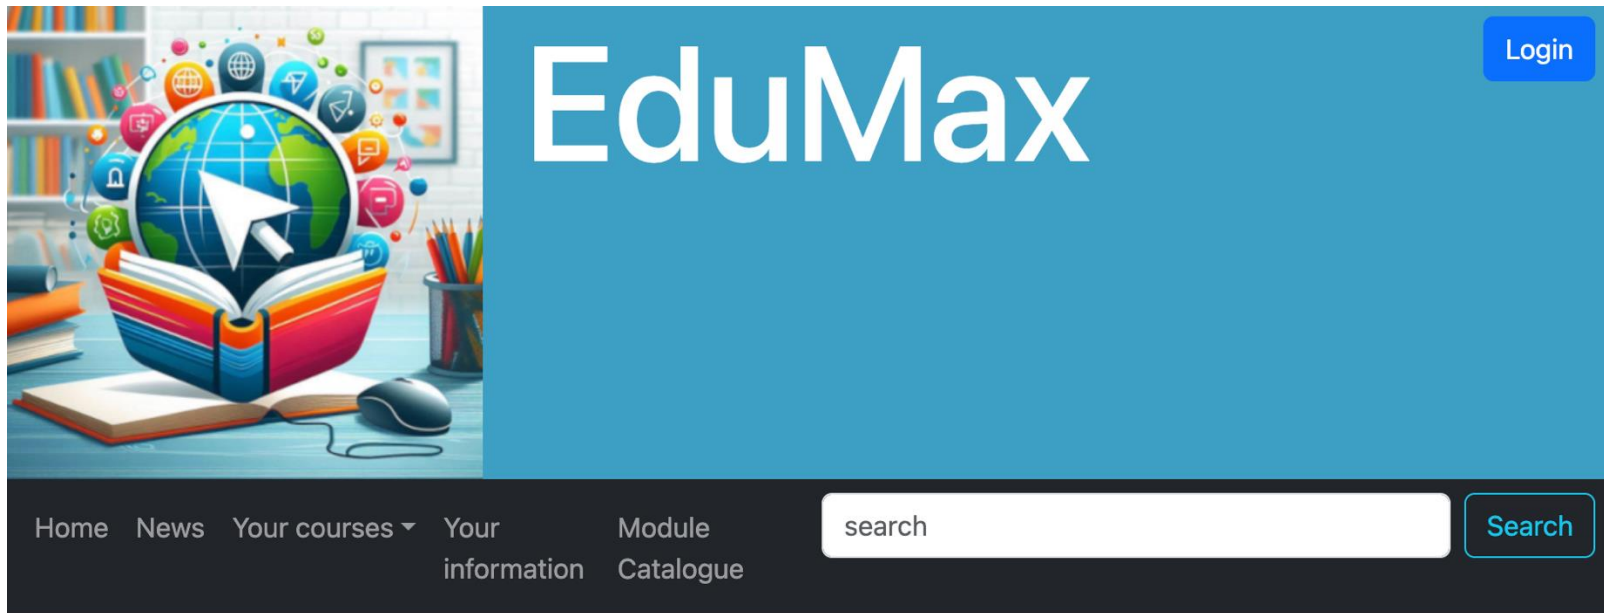

| Section | Word count |
|-------------------------------------|-------------------|
| Part 2b (Introduction & Conclusion) | 200 |
| Part 2b | 500 |
| Part 4a | 400 |
| Part 4b | 400 |
| Part 5 | 500 |
| Total | 2000 + 10% |

Checklist with advice on writing

- The text is appropriate for its audience
- The spelling and grammar have been checked
- The text has a proper layout and structure
- The text is coherent
- The text does not exceed the maximum length
- You have used citations with a reference list

Part 3a Form implementation

Use TMA01 resource pack

Part 3a Form implementation

Plenty of resources

- <https://getbootstrap.com/docs/4.1/components/forms/>
- https://www.w3schools.com/bootstrap5/bootstrap_for_ms.php
- There are some decent tutorials on YouTube e.g.:

Part 3a Form implementation

Check your files for errors with Wave?

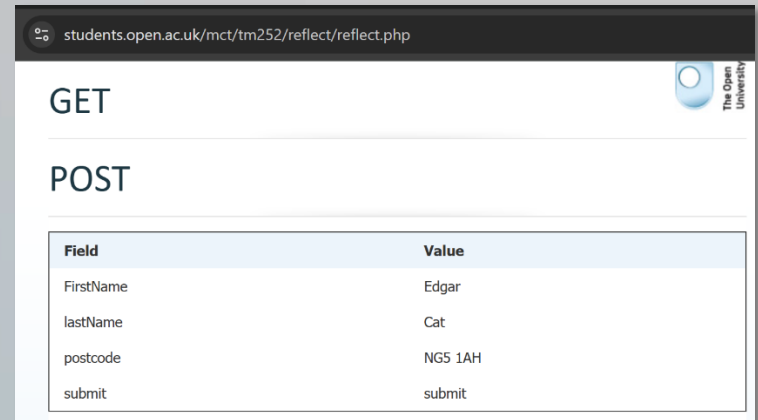

Testing functionality

Check the data your form sends to the reflector page:

- Check HTTP method i.e. data appears in POST section
- Check input names and values
- Check hidden *itemID* input name and value

- No screenshots required!

| Field | Value |
|-----------|---------|
| FirstName | Edgar |
| lastName | Cat |
| postcode | NGS 1AH |
| submit | submit |

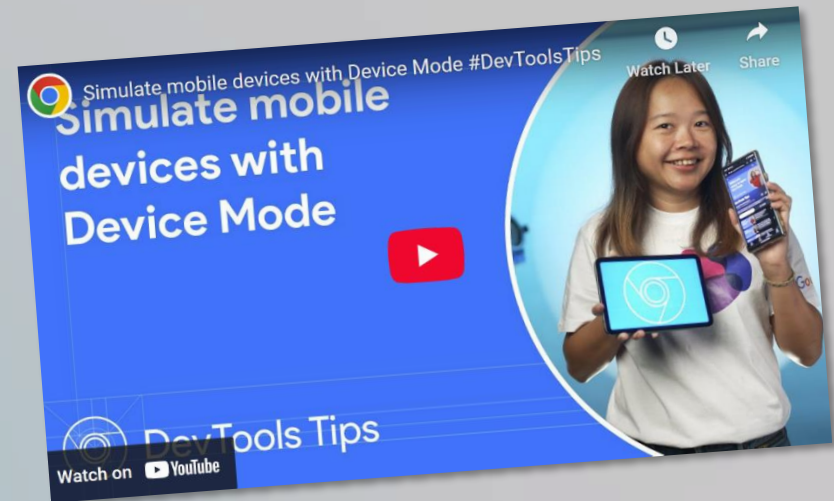

Testing responsiveness

Resize window or use DevTools / Device Mode:

- See **EMA guidance** video in module Resources tab
- See [Google tutorial or video](#) especially **Preset media query breakpoints**

- No screenshots required!

Testing HTML and CSS validity

Use W3C HTML and CSS validators:

- See Block 1 tutorials
- Review your TMA01 feedback on validation
- Fix errors; fix or explain warnings
- Provide captioned screenshots as evidence of testing

The screenshot shows the W3C Markup Validation Service interface. At the top, the W3C logo is on the left, and the text "Markup Validation Service" and "Check the markup (HTML, XHTML, ...) of Web documents" is on the right. Below this, there are three tabs: "Validate by URI", "Validate by File Upload", and "Validate by Direct Input". The "Validate by Direct Input" tab is selected. Under this tab, there is a section titled "Validate by direct input" with a label "Enter the Markup to validate:". Below the label is a text area containing the following HTML code:

```
<!DOCTYPE html>
<html>
<head>
<meta charset="utf-8"/>
<title>OURC Home page</title>
<meta name="author" content="Author Name"/> <!-- Add your own name here -->
</head>
<body>
<div>
<div>Open University Running Club</div>
<nav>
<ul>
<li><a href="ourc_home.html">Home</a></li>
```

Below the text area, there is a link "More Options" and a "Check" button.

Part 3b Use of version control

Provide evidence of your use of version control in your solution document. Include **either**:

- ▶ one or more screenshots of the **git log** or equivalent command output for your repository showing evidence of meaningful commits to your Part 3 solution files over time, or
- ▶ one or more screenshots of the history of your repository in the Git (or equivalent) GUI showing evidence of meaningful commits to your Part 3 solution files over time.

EMA Part 4

EduMax have some vague requirements which you need to clarify...

4(a): Front-end Framework (10 marks)

- **Review sources given in answer** and **do further research**
- Ask a relevant question to EduMax
- Suggest 2 possible answers
- Provide advice + reasoning for each answer
- Include an academic citation
- **Word limit: 400 words**

4(b): Sustainability (10 marks)

- Same structure as 4(a), focused on sustainability
- For example: self-hosted server vs cloud solution
- **Word limit: 400 words**

Choice depends on project needs and constraints, e.g., scale/complexity, developer skills, existing solution

EMA Part 4a Front-end Frameworks

Week 17 See case study

<https://learn2.open.ac.uk/mod/oucontent/view.php?id=2403355§ion=4>

Consider: React, Vue, Angular, Svelte, etc....

**Note: Word limit is
400 words**

EMA Part 4b Sustainability

Week 10 section 2.2.5

<https://learn2.open.ac.uk/mod/oucontent/view.php?id=2403093§ion=3.2.5>

Look at Microsoft's approach

<https://learn2.open.ac.uk/mod/oucontent/view.php?id=2403093§ion=3.2.5>

<https://www.microsoft.com/en-us/corporate-responsibility/sustainability>

**Note: Word limit is
400 words**

EMA Part 5 Reflection

What is needed

- If you were to consider a career working with web technologies, what role might you aim for and why?
- What knowledge, skills or attitudes relevant to this role have you gained in studying this module or in prior study? How well did that go?
- What knowledge or skills would you look to develop in future and how would you go about this?

**Note: Word limit is
500 words**

Part 5 Reflection

Models of reflection

- Keep a Journal
- FutureYou

What to submit?

Four files all zipped together

- Balsamiq file (or equivalent) of site map and wireframes for your Part 2 solution
- form.html file containing the HTML code for your Part 3 solution
- custom.css file containing the custom CSS code (if any) for your Part 3 solution
- solution document with your written submission for Parts 1–5.

NO OTHER FILES – Examiners have these!

Pre-submission checklist

- Followed the specified structure for your report.
- Written in an appropriate style.
- Checked your spelling and grammar using tools built into your word-processing software (e.g. Microsoft Word).
- Proofread your solution document to check that it makes sense and is readable.

Pre-submission checklist

Three files all zipped together

- ▶ Included word counts where required.
- ▶ Captioned any images (figures).
- ▶ Cite all of your references and included references for all your citations in the Cite Them Right Harvard style.
- ▶ Checked your draft prior to submission using the Turnitin tool.

**Thank you for coming,
Good luck with the EMA and future OU
Studies**

Stop recording

Not recorded

Question and Answer

Turn your microphone on and ask a question, or if you prefer ask in the chat.
